CUSTOMER NEEDS

- Automated lifecycle management of certificates for EV charging stations.
- Integration with device provisioning systems.
- Compatibility with Microsoft ADCS and ACME protocols.

Solution

- Automated certificate enrollment and renewal using ACME and EST modules.
- Integration with provisioning systems to enable secure onboarding of devices.
- Centralized visibility and monitoring of IoT certificates.

Outcomes & Benefits

- Certificates automatically deployed and renewed on charging stations.
- Reduced downtime and improved customer trust in charging services.
- Alignment with GCC smart city and energy digitization initiatives.

Future Outlook

- IoT CLM frameworks designed to support PQC migration.
- Scalable model for new IoT ecosystems beyond energy (smart grids, connected healthcare).
