# Centralized Multi-PKI Deployment

A leading GCC telecommunications provider required unified control over certificates issued by multiple internal and external PKIs.

Explore our free use case and see how RNTrust can support you.

CUSTOMER NEEDS

- Manage certificates across multiple PKIs (OpenTrust, DigiCert, Entrust).
- Support diverse use cases including TLS, S/MIME, and authentication.
- Ensure high availability in production environments.

Solution

- Centralized CLM platform integrating multiple PKIs.
- Automation of issuance, renewal, and revocation.
- Discovery tools to locate and bring shadow certificates under management.

Outcomes & Benefits

- Improved visibility across enterprise certificates.
- Reduced outages due to expired certificates.
- Better compliance and operational efficiency.

Future Outlook

- Preparedness for certificate lifespan reduction to 90 days.
- Support for PQC-ready certificates for telecom security and 5G ecosystems.
